

CP Cases & Amazon Cases

About US

CP Cases Ltd has been established for 35 years and is involved in the design and manufacture of cases, bags and 19 inch electronics racks. We manufacture in a wide range of materials including aluminium, laminated plywood and plastic composites.

Rotomoulded polyethylene cases and racks are designed and manufactured by Amazon Cases Ltd, a wholly owned subsidiary of CP Cases Ltd. Both companies are accredited to ISO 9000.

Located near London Heathrow Airport the company employs 40 skilled designers and manufacturing staff.

We operate in several market sectors including medical, defence and broadcast. The common factor is that we offer protection for delicate and expensive equipment through the design of reusable transit and storage protection.

Our method of working can be broken down into two major categories:

1. Standard cases and bags for specific applications:

These are off the shelf items for specific industries, for example camera bags for broadcast professionals and a standard range of rotomoulded cases and 19 inch racks.

2. Made to measure cases, bags and racks for original equipment manufacturers

This involves the design of a protective solution for a specific application, for example the design and manufacture of a polyethylene rotomoulded case for a portable dialysis unit.

Credentials

Examples of some of the projects we have undertaken in different sectors are described below:

For the Medical industry we manufacture:

- Operational bags to take portable electronic test equipment.
- Wheeled aluminium cases for autoclave trays.
- Cases to transport orthopaedic products.
- Presentation cases with internal foam fitments for product demonstration.
- Rotomoulded polyethylene containers to hold portable home dialysis units.

For the Defence industry we manufacture:

- Tool cases with internal routed foam packs for tool control.
- Rotomoulded polyethylene containers for transit and deployment of military equipment.
- Rotomoulded polyethylene insulated containers for food storage.
- Aluminium containers for missile transit.
- Ruggedised 19 inch electronics racking for telecommunications equipment.

For the Broadcast industry we manufacture:

- A standard range of cases and bags for broadcast video cameras and equipment under the ProBag brand.
- A made to measure service for broadcast professionals for cases and bags for broadcast equipment.
- A full range of 19 inch racking with and without anti-vibration mounts for broadcast applications.

CP Cases and Amazon Cases between them offer the broadest selection of transit packing solutions worldwide.
